

Free EasyPower® Arc Flash Workshop in Portland

Do you have the resources to achieve and maintain NFPA-70E compliance?

The pressure to do more with less is a burden at every level of corporate management. When it comes to electrical safety compliance, the situation is complicated further by overlapping regulations and changing compliance standards.

We are pleased to present an Arc Flash Workshop that provides information on how EasyPower software helps to ease some of this burden. The focus of this no-cost, 1/2-day workshop is on reducing cost, improving awareness of arc flash hazards, and maintaining compliance in an ever-changing environment of government guidelines.

The EasyPower Arc Flash Workshop provides hands-on examples and is ideal for facility and maintenance personnel with questions about this subject.

When: **Thursday, September 21, 2017**
8:00am to 11:30am
(bring your Windows® laptop and mouse)

Where: **EasyPower Offices**
7730 SW Mohawk St.
Tualatin OR 97062
503-655-5059

Who should attend: Facilities managers, facilities engineers, facilities maintenance, engineering consultants, educators, and professors.

Agenda:

- Arc Flash - Why?
- What are the regulations?
- Who/How to conduct an Arc Flash assessment?
- What does a report look like?
- How does protective device coordination affect Arc Flash study results?
- Hands-on with EasyPower

Bring your laptop and mouse to have a hands-on experience, including a free two-week trial version of EasyPower.
